All of Jiwa's pre-rolled cones can be ordered in a variety of rolling papers:

Our **wood paper** cones are the most popular and have been for a very long time. Classic and timeless, Jiwa wood paper cones will stay lit through a storm and will maintain a slow and even burn rate.

Our **hemp paper** cones are the most environmentally-conscious option and will take on a delicate aftertaste that will elevate the aroma of your bud. Our natural hemp paper is certified organic under EU Organic Regulations.

The **Jiwa watermark** was developed to further improve the even-burning of our pre-rolled cones and to prevent runs.

All of our pre-rolled cones and custom branded cones are **lab-tested in certified laboratories** in the USA and Canada under the strictest testing standards. They are compliant with the FDA and Health Canada requirements.

Jiwa cones are **fully compatible** with the Knockbox, Thumper, and **most industrial fully automated filling machines**.
